

To be the most livable town in Canada.

Notice of Study Commencement

Munn's Creek Stabilization and Rehabilitation Study Municipal Class Environmental Assessment Study Munn's Creek from Upper Middle Road to Culham Street

The Study

The Town of Oakville has initiated a Municipal Class Environmental Assessment (Class EA) Study to address the problem of erosion and creek instability along Munn's Creek between Upper Middle Road and Culham Street.

Failure of existing bank protection and bank erosion are prevalent throughout the study area and have the potential to impact residential properties as identified in the town-wide 2015 Creek Erosion Inventory and Assessment Study.

This study will develop, evaluate and recommend preferred alternatives to reduce the risk from creek erosion and possibly stabilizing creek banks as needed in areas of concern.

The study is being carried out in accordance with Schedule B requirements as outlined in the Municipal Engineers Association Municipal Class EA (October 2000, as amended to 2015), which is approved under the Ontario *Environmental Assessment Act*.

Comments Invited

The town appreciates your feedback* and encourages you to get involved. A key component of the study is consultation with interested stakeholders, Indigenous groups, the public, landowners and regulatory agencies. If you would like more details, have questions, or would like to be added to the study mailing list, please contact:

Diana Friesen, B.Sc., C.E.T.
Town of Oakville

Two Public Information Centre (PICs) will take place to discuss issues related to the project, including alternative solutions, evaluation criteria, environmental impacts and mitigation measures. The dates and details of the PICs will be advertised. Once the study is complete, the Project File containing a complete record of the activities associated with the planning of the project will be made available for public review and comment. A Notice of Completion will be issued at that stage.
