

OAKVILLE

**NOTICE OF CONSTRUCTION  
SHELburnE PROMENADE SHORELINE IMPROVEMENTS  
TOWN PROJECT EC-67-16 (T-41-2018)**

**Dear Resident/Property Owner:**

Commencing in early August 2018, the Town of Oakville will be carrying out major works to improve the shoreline within Shelburne Park, directly adjacent to Lake Ontario. The area of works has been identified on the attached map. Additional works including widening the mouth of Sheldon Creek have been added since the public meeting occurred. Updated drawings can be viewed at <https://www.oakville.ca/environment/shelburne-promenade-shoreline-rehabilitation.html>

The works will include the use of heavy construction equipment along the park trail adjacent to Lake Ontario. During this time, the affected Shelburne Park trail and access points will be closed off to the public. Access for construction equipment will be via Shelburne Place.

There will be some impacts to vegetation and trees adjacent to the shoreline and creek. Restoration works, including tree planting, have been incorporated in this project.

The majority of the construction is scheduled to last approximately 8 weeks (weather permitting), with restoration of the area to follow afterwards.

Should you have any questions or concerns, please contact the undersigned.

**Ms. Kristina Parker, M.A.Sc., P.Eng.**
