

To be the most livable town in Canada.

Open House #2

Municipal Class Environmental Assessment Study Burnhamthorpe Road Character Study

April 30, 2014 – 6:30 p.m.
Presentation at 7 p.m.
Town Hall, 1225 Trafalgar Road
Oakville/Trafalgar Room

Your Input is Important!

At this open house, the project team would like to meet with you to obtain input, present the project details, review study findings, and address comments and concerns. The Town of Oakville appreciates your feedback and ideas and we encourage you to get involved.

At the first open house on June 25, 2013, participants were given the opportunity to learn about this study and give preliminary input. Since then, the project team has undertaken a detailed assessment of the study corridor, developed a set of alternative road designs for the corridor, finalized a set of evaluation criteria based on public and stakeholder input, assessed each alternative against the evaluation criteria, and selected a preliminary preferred design for the corridor.

At this open house you will have the opportunity to review and comment on the preliminary preferred design. Input received will be used to determine whether any changes or adaptations are needed, finalize the preferred design, and document the process in an Environmental Study Report expected to be available for public review in the spring of 2014.

This Class Environmental Assessment (EA) study was implemented to develop a new road design for sections of Burnhamthorpe Road between Ninth Line and Sixteen Mile Creek. Burnhamthorpe Road is currently designated as a regional arterial road under the jurisdiction of Halton Region. However, the approved New North Oakville Transportation Corridor is expected to address future east-west travel demands in the vicinity of Burnhamthorpe Road, replacing the regional road function for this area. The remaining portions of Burnhamthorpe Road (see map below) will be converted to a character road facility to serve the growing North Oakville community.

If you have any accessibility needs, please let us know one week before the event by contacting Lin Rogers, Town staff: Lin Rogers, P. Eng, Transportation Engineer by phone at 905-845-6601, ext. 3236 or email burnhamthorpe@oakville.ca, or by filling out the accessible online feedback form on oakville.ca.

For the most current information about this study including meeting dates, or to submit your questions and comments, please email burnhamthorpe@oakville.ca to be added to the mailing list or contact a member of the project team:
