

Deer Run Avenue Class Environmental Assessment – Received Comment Cards
Public Information Centre # 2 - May 19, 2016

| What do you think of the preferred solution - Design Option 2 - Deer Run Ave. extension? | Additional comments: |
|---|--|
| My concerns with option 2 is speeding. I prefer to have it CLOSED | |
| <ul style="list-style-type: none"> • Yes. Definitely in favour • Sooner than later • Traffic flow in neighbourhood is terrible right now. • Needs to be monitored for speed!! | |
| Great! Put it in tomorrow | |
| I totally agree with option 2! Having lived in the area for many years I enjoyed the convenience of the extension. | |
| Agree – Please complete the work ASAP. Also I have no objection to speed bumps. | |
| I agree with the preferred solution. It gives residents access to WCB again. | Please continue to keep residents informed – when this item goes to Council, Council’s ruling, timing, etc. and also if there is an opportunity to make a short plea to Council to proceed with the project. |
| Agree! Need this access route for Residents/Fire/Emergency etc. | Go! |
| Our concern with option 2 is increased traffic and safety because of speeding which is already an issue. | I prefer option one, want intrusive cul-de-sac. |
| I love option 2! | Having watched Fort McMurray, I am all for extra access to/from the area. We know many from other side of Ford who used this extension of Deer Run when it was open – Now that we have to use Cornwall/Ford & Ford/Royal Windsor intersection we appreciate how much more idling we have to do. These are very busy & frustrating intersections. |
| Bravo!!! | ASAP would be good would be nice to see before we relocate to retirement condo – we’re been there for 26 years. Also, sooner means cheaper as the market is hot, & the price is getting so expensive. We will pay more & more & taxes are high enough. |
