

To be the most livable town in Canada.

Notice of Open House (Public Information Centre #2)

Deer Run Avenue Laneway Access Municipal Class Environmental Assessment Study

**Thursday, May 19, 2016
Drop-in from 2 to 8 p.m.**

**Town of Oakville, Trafalgar Room
1225 Trafalgar Road, Oakville ON, L6H 0H3**

The Town of Oakville has initiated a Municipal Class Environmental Assessment (EA) study to study and address the local roadway servicing needs at the east end of Deer Run Avenue. While the temporary emergency access is not a public roadway, there has been public use of the emergency access to gain access to and from Winston Churchill Boulevard. The Town has recently restricted access to the temporary emergency access to prevent such public use pending a review of the local road network and transportation needs of the community through a Class Environmental Assessment.

The Town of Oakville wishes to provide a safe, efficient and integrated transportation system for the movement of people and goods, and to modify the existing road network in this area as may be required to achieve this objective.

At a public meeting on November 26, 2015, the town presented different options for addressing the local roadway servicing needs and received public input regarding those options.

Since then town staff has evaluated each option and identified a preferred solution. At the open house on May 19, 2016 town representatives will be available to discuss the study and preferred option as well as answer questions and obtain your input.

Your input is important!

We appreciate your feedback and encourage you to get involved. A key component of the study will be consultation with interested stakeholders, the public, land owners and regulatory agencies.

Please be advised that the public information centre will be a drop-in format. A formal presentation will not be provided.

The study will be conducted in compliance with Part A. – Class EA Planning Process, as defined in the Municipal Engineers Association (MEA) Municipal Class EA document (October 2000, as amended in 2007 and 2011), which is an approved process under the *Ontario Environmental Assessment Act*. The study will address Phases 1 and 2 of the Class EA process, and fulfill requirements for Schedule B projects.
