Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

Intersection Summary

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

MEMORANDUM

TO

Matt Krusto, Halton Region

Aquisha Khan, Town of Oakville

Usman Akhtar, MTO

FROM	PROJECT	DATE
Clara Filipetti	6931-03 420-468 South Service Road	September 18, 2024

RE: 420-468 SOUTH SERVICE ROAD – PROPOSED TRAFFIC ANALYSIS TERMS OF REFERENCE

BA Group has been retained by The Rose Corporation to provide transportation consulting services in support of an Official Plan Amendment (OPA) being made to the Town of Oakville for a proposed mixed-use development to be located at the lands municipally known as 420-268 South Service Road East (herein referred to as "the site"), in the southeast quadrant of the Queen Elizabeth Way (QEW) / Trafalgar Road. The 27.3 acre site is a roughly rectangular parcel bounded by the QEW to the north, commercial uses to the west and east, and the Lakeshore West GO rail corridor to the south. The site location is shown in **Exhibit 1**.

The site was formerly the location of the General Electric Canada Lamp Plant. It is currently vacant, with the exception of a 2-storey former GE office building along South Service Road.

A Temporary Use By-law was granted in May 2024 to permit the temporary use of the site for the outdoor storage of trailers, motor vehicles and shipping containers for use as storage containers.

The proposed redevelopment is for a mixed-use community containing in the order of 7,000 units, a mix of non-residential uses and a large public park. A network of new streets is contemplated through the site and through the surrounding Midtown Oakville neighbourhood, consistent with the Town of Oakville's Midtown Oakville Draft OPA (April 2024).

Exhibit 1: Site Location

1.0 SCOPE OF WORK

1.1 Study Area Intersections

The study area is proposed to comprise of the following intersections:

Existing Intersections

- Trafalgar Road & Iroquois Shore Road / Leighland Avenue
- Trafalgar Road & North Service Road / Highway 403 WB Off-Ramp
- Trafalgar Road & Highway 403 EB Off-Ramp
- Trafalgar Road & Argus Road
- Trafalgar Road & Cross Avenue / South Service Road East
- Trafalgar Road & Cornwall Road
- South Service Road East / Davis Road
- South Service Road East / Chartwell Road
- South Service Road East / The Canadian Road & Royal Windsor Drive / Highway 403 WB On/Off Ramp

Future Intersections (to be constructed with the buildout of the site and the Midtown Oakville Road Network)

- Cross Avenue / South Service Road
- Site-related Intersections (to be determined)

1.2 Traffic Analysis Periods

Traffic analysis will be undertaken for the weekday morning and afternoon peak hours within the peak periods of 7:00 a.m. – 9:00 a.m. and 4:00 p.m. – 6:00 p.m., respectively.

1.3 Traffic Analysis Scenarios

Traffic analysis will assume a 20-year buildout for the site as well as the Midtown Oakville OPA road network. The following scenarios will be reviewed:

- Existing Conditions (2024)
- Future Background Conditions (2044), assuming background development traffic (discussed below) and the full buildout of the ultimate road network
- Future Total Conditions (2044), assuming the buildout of the site and the full buildout of the ultimate road network

1.4 Study Guidelines / Policies

The following guidelines will be referenced:

- Halton Region's Transportation Impact Study Guidelines (January 2015)

- Halton Region's Access Management Guideline (January 2015)
- Town of Oakville's Livable by Design Manuals
- Draft Midtown Oakville Official Plan Amendment (2024)

1.5 Data Collection

Traffic data collection, including data related to pedestrians, cyclists, vehicles, trucks, and buses has been undertaken by Spectrum Traffic Data Inc. on behalf of BA Group on Tuesday, June 4th, 2024. The relevant signal timing plans have been requested from the Town of Oakville.

1.6 Background Traffic

1.6.1 General Corridor Growth

Historical counts at intersections along Trafalgar Road in the study area will be reviewed to determine an appropriate corridor growth assumption, if any, to apply along the study area roads.

1.6.2 Background Developments

Potential future developments based on active applications found on the Town of Oakville's development application portal are being reviewed to determine the additional traffic to be added to the study area intersections. The following developments have been identified and will be included as a part of this study:

- 157-165 Cross Avenue
- 177 Cross Avenue
- 207 Cross Avenue & 571 Argus Road
- 570 Argus Road
- 590 Argus Road
- 166 South Service Road
- 271 Cornwall Road
- 349 Davis Road
- 599 Lyons Lane
- 627 Lyons Lane

1.7 Site Trip Generation

Travel demands for vehicles, transit users, cyclists, and pedestrians will be determined using information from the 11th Edition of the ITE Trip Generation Manual.

Additionally, the Transportation Tomorrow Survey (TTS) will be reviewed to determine mode splits, in conjunction with information collected from the proxy site surveys.

1.8 Trip Distribution

Vehicle, pedestrian, transit, and cycling trips will be distributed using information from the TTS as well as a review of existing travel patterns from the turning movement counts.

1.9 Traffic Analysis

Traffic analysis will be undertaken using Synchro 11 software.

2.0 TRANSPORTATION DEMAND MANAGEMENT

A TDM Plan, which seeks to reduce the number of single-occupant vehicle trips generated by the site, will be provided in the TIS.

3.0 VEHICLE PARKING, LOADING AND BICYCLE PARKING

The appropriateness of the supply of vehicle parking, loading and bicycle parking spaces for the site will be reviewed in the context of relevant Town and Provincial zoning bylaws and policies.

Outlook

RE: [EXTERNAL] 420-468 South Service Road - Transportation Study Terms of Reference

[EXTERNAL] FW: 420-468 South Service Road - Transportation Study Terms of Reference;

Hi Clara,

Thank you for providing a copy of the TOR for our review.

- Please structure the Traffic Impact Assessment Study as per Provincial TIS Guidelines and Headings
- Please use a 3% growth rate for all municipal roadways within the study area.
- Please include in the Study intersections:
  - Chartwell Road & Cornwall Road
  - Please use the approved EA report (2013) for the anticipated/proposed intersections on the east side of Trafalgar. (please note these intersections may change throughout the duration of the project at which time the report would require updating).
- Please include a Parking section in the report
- Please include a TDM section in the report
- Please include a Traffic Calming section in the report
- Please include a Sightline Review section in the report
- Please include an Access review section in the report.
- Please include all warrant(s) analysis in the Appendix.

If there are any questions or concerns to the above, please feel free to contact me.

Have a great day and a memorable Thanksgiving 😊!
