

Phase One Environmental Site Assessment Update

Eno Investments Limited Property
374 Burnhamthorpe Road West
Town of Oakville, Ontario

Prepared for:
Eno Investments Ltd.
c/o The Remington Group

Prepared By:
AME – Materials Engineering

January 16, 2023

AME Project Nos: 30291.124

EXECUTIVE SUMMARY

The Phase One Property is located on the south side of Burnhamthorpe Road West. Specifically, the Phase One Property is comprised of the parcel which is assigned the municipal addresses 374 Burnhamthorpe Road West.

The Phase One Property mainly consists of agricultural lands. There is a gravel roadway, used to provide access of construction vehicles / workers to a residential construction development, south of the Phase One Property from Burnhamthorpe Road West. The Phase One Property is irregular in shape and consists of an area of approximately 36.42 hectares (90 acres).

The approximate UTM coordinates of the centroid of the Phase One Property are Zone (17T) 600767 m E & 4815216 m N.

The neighbouring properties consist of Burnhamthorpe Road West, followed by agricultural / residential properties / new roadway development to the north, residential and agricultural properties to the east, vacant agricultural properties and a residential development to the south & agricultural properties to the west. No property within the vicinity of the Phase One Property is used for automotive / industrial / gas station / dry-cleaning purposes.

It is our understanding that this Phase One ESA Update is required in support of a proposed residential development.

Historical research, land title research, interview and a site inspection were conducted to determine the environmental risks associated with the past and current uses of the Phase One Property.

Based on the review of records, the site visit and the interview, we have identified the following Potentially Contaminating Activity (PCA) pertaining to the Phase One Property:

PCA 1: Potential Application / Use of Pesticides at the Phase One Property in association with the agricultural use.

The majority of the Phase One Property has been used for agricultural purposes since at least 1934. Furthermore, based on the review of the historical data, there was an orchard located at the northern section of the Phase One Property. Hence, regulated pesticides may have been applied as part of the agricultural use. Pesticides (including herbicides, fungicides and anti-fouling agents) manufacturing, processing and large-scale applications are listed as being PCA 40 in Column A of Table 2 in Schedule D of O.Reg. 153/04 (as amended).

However, it should be noted that topsoil / underlying soil samples were retrieved from the Phase One Property as part of a previous Phase Two Environmental Site Assessment – conducted in 2020. The samples were submitted for analysis of potential contaminants of concern pertaining to the application of regulated pesticides.

Based on the results of the analysis, there is no evidence that the application of regulated pesticides had an adverse effect on the environmental quality of the topsoil / underlying soil at the Phase One Property.

Hence, we are of the opinion that no further environmental works are required at this time and the Phase One Property is suitable for the proposed residential use.

1.0 INTRODUCTION

In accordance with your request, **AME - Materials Engineering (AME)** has executed a Phase One Environmental Site Assessment Update ('Phase One ESA Update') for a site consisting of 374 Burnhamthorpe Road West, in the Town of Oakville, Ontario, is hereinafter referred to as being the 'Phase One Property.'

The location of the Phase One Property is presented on the Phase One Property Location Plan (Drawing No. 1 in Appendix A).

The Phase One Property and the other properties wholly or partially within 250 m from the boundaries of the Phase One Property are collectively referred to as the 'Phase One Study Area' in this report.

The assessment was executed in order to determine the potential for contamination to be present at the Phase One Property which might pose a hazard to humans or the environment, or which may have a significant impact on the value of the property. This was achieved by performing a historical review of the past uses of properties within the Phase One Study Area, using readily available public records from the Provincial and Municipal governments.

This Phase One ESA Update was prepared by **AME** for Eno Investments Ltd., in care of The Remington Group (referred to as the 'client'). The procedures and protocol for this Phase One ESA Update are in accordance with Ontario Regulation 153/04 (as amended) made under the Environmental Protection Act, and the material in it reflects the best judgement of personnel with **AME**, in light of the information available at the time of report preparation.

Conditions noted in this report are general in nature. This report presents the results of the investigation and the conclusions we have drawn regarding the possible impact of the conditions observed at the time of making the assessment.

1.1 Property Information

The Phase One Property is located on the south side of Burnhamthorpe Road West. Specifically, the Phase One Property is comprised of the parcel which is assigned the municipal addresses 374 Burnhamthorpe Road West.

The Phase One Property mainly consists of agricultural lands. There is a gravel roadway, used to provide access of construction vehicles / workers to a residential construction development, south of the Phase One Property from Burnhamthorpe Road West. The Phase One Property is irregular in shape and consists of an area of approximately 36.42 hectares (90 acres).

The approximate UTM coordinates of the centroid of the Phase One Property are Zone (17T) 600767 m E & 4815216 m N.

The neighbouring properties consist of Burnhamthorpe Road West, followed by agricultural / residential properties / new roadway development to the north, residential and agricultural properties to the east, vacant agricultural properties and a residential development to the south & agricultural properties to the west. No property within the vicinity of the Phase One Property is used for automotive / industrial / gas station / dry-cleaning purposes.

2.0 SCOPE OF INVESTIGATION

The assessment was executed in order to determine the potential for contamination to be present at the Phase One Property which may be detrimental to humans or the environment, or which may have a significant impact on the value of the Phase One Property. This was achieved by performing a historical review of the past uses of the Phase One Study Area using readily available public records from the Provincial and Municipal governments, aerial photographs, topographic maps, a historical atlas and title searches.

A visual inspection of the Phase One Property was conducted on Thursday December 8, 2022, in order to identify any area of potential environmental concern pertaining to the Phase One Property.

An interview was conducted with a person knowledgeable of the Phase One Property on January 13, 2023.

This report is indicative of the conditions at the time of our review of records, interviews, and site visit. Conditions noted in this report are general in nature. This report presents the results of the investigation and the conclusions we have drawn regarding potential environmental impact at the Phase One Property.

3.0 HISTORICAL RECORDS REVIEW

3.1 General

3.1.1 Study Area Determination

The following considerations were made by the Qualified Person 'QP' regarding the selection of the Phase One Study Area:

- * No property within the vicinity of the Phase One Property is used for automotive / industrial / gas station / dry-cleaning purposes.
- * The Phase One Property is situated in an area which is generally considered to be rural.

Based on the relatively low risk of the above stated factors, the Phase One Study Area presented in this report will consist of the Phase One Property and any other property, partially or wholly, within 250m from the boundaries of the Phase One Property (as generally stipulated in O.Reg. 153/04).

3.1.2 First Developed Use

The historical atlas of Halton County (now the Regional Municipality of Halton) was searched. A census map from the year 1875, showing the Phase One Property, was obtained. The Phase One Property is part of Lots 18 & 19, Concession 1, North of Dundas Street (NDS), Oakville.

The map indicates that the Phase One Property consists portions of larger agricultural estates owned by Benjamin Tuck & George Bowbeer.

There are two (2) structures and an orchard located at the northern central section of the Phase One Property.

The neighbouring properties consisted mainly of a roadway to the north, followed by agricultural and residential properties, to the north & agricultural properties with residential components to the east, south & west.

An excerpt from the 1875 historical census map, showing the location of the Phase One Property, is presented on the 1875 Historical Census Map of Halton County (Drawing No. 2 in Appendix A).

3.1.3 Fire Insurance Plans

No fire insurance plan was available for the Phase One Property.

3.1.4 Chain of Title

Information pertaining to the parcel is presented in Table A.

Table A: Information from Parcel Register

Municipal Address	Property Identifier Number (PIN)	Property Description	Owners Interest	Registered Owner
374 Burnhamthorpe Road West	24929-0217 (LT)	PT LTS 18 & 19, CON 1, NDS, PT1 20R17295; OAKVILLE	Fee Simple	Eno Investments Limited & Beneficial Owners (Ruland Realty Inc., G.C. Family Investments Inc. & Matthew-Donatus Limited)

The chain of title indicates that the Phase One Property was generally transferred through private individuals and recently real estate and / or development corporations. Tables indicating the current and past uses of the Phase One Property are presented in Appendix B.

3.1.5 Occupancy Directories

A Phase One ESA was previously conducted in 2012, for the portion of the Phase One Property.

The Oakville City Directories for the years 1965, 1970, 1975, 1981, 1985, 1990, 1994, 1995, 1998 & 2001, were reviewed.

There were no records of any businesses being at the Phase One Property. However, there were records for some businesses at properties within 250 m from the boundaries of the Phase One Property. Information pertaining to the records for these businesses are presented in Table B.

Table B: Oakville City Directory Records of Businesses being within 250 m from the boundaries of the Phase One Property

Municipal Address	Business Name	Years of Operation	Type of Business	Distance and Direction from Phase One Property
185 Burnhamthorpe Road West	Featherstone D. Ornamental Metal / Featherstone D. Custom Services	1981 through 2001	Custom Metal Fabricator	Approximately 50 m north of the north-east corner of the Phase One Property
391 Burnhamthorpe Road West	Welding Institute of Canada	1981	Welding	Approximately 160 m west of the Phase One Property
391 Burnhamthorpe Road West	4 Comm Integrated Technologies Inc. / All Care Landscape	2001	Communications & Landscaping	Approximately 180 m west of the Phase One Property.

Note: The above noted properties are mainly residential properties with a business component. They are not considered to be major commercial properties.

3.1.6 Previous Geotechnical / Environmental Reports

AME conducted previous reports pertaining to the Phase One Property. A Geotechnical Investigation (conducted in 2012), a Phase One Environmental Site Assessment (conducted in 2012), a Phase One Environmental Site Assessment Update (conducted in 2020), a Phase Two

Environmental Site Assessment (conducted in 2020) and the filing of a Record of Site Condition (filed in 2021) were conducted for the Phase One Property. Information pertaining to these previous investigations are summarized below:

3.1.6.1 2012 Geotechnical Investigation (AME)

A geotechnical investigation was conducted for the Phase One Property in 2012. The geotechnical investigation was titled 'Geotechnical Investigation, Proposed Residential Development, 374 Burnhamthorpe Road West, Town of Oakville, Ontario (Reference No. 40220.240),' and was dated September 2012.

The geotechnical investigation consisted of the advancement of twenty-two (22) boreholes to depths ranging from 5.0 to 8.1 mbgs.

In general, the underlying soil conditions consisted of a layer of topsoil, followed by disturbed / reworked native soil and in-situ native soil consisting of silty clay / clayey silt with some sand seams. The native soil is underlain by weathered shale.

No visual / olfactory evidence of potential contamination was noted during the retrieval of the soil samples from the boreholes.

3.1.6.2 2012 Phase One Environmental Site Assessment (AME)

A Phase One Environmental Site Assessment ('Phase One ESA') was conducted for the Phase One Property was conducted in 2012. The Phase One ESA Update was titled 'Phase One Environmental Site Assessment, 374 Burnhamthorpe Road West, Oakville, Ontario (Reference No. 40220.240),' and was dated September 18, 2012.

Based on the review of records, the site visit and the interviews, no item of potential environmental concern was noted at 374 Burnhamthorpe Road West.

Furthermore, there is evidence of a former structure, septic tank and water well being at the north-western section of the property.

3.1.6.3 2020 Phase One Environmental Site Assessment Update (AME)

A Phase One Environmental Site Assessment Update ('Phase One ESA Update') was conducted for the Phase One Property in the year 2020. The Phase One ESA Update was titled 'Phase One Environmental Site Assessment Update, 210 & 374 Burnhamthorpe Road West, Town of Oakville, Ontario (Reference Nos. 30291.124 & 30291.125),' and was dated July 14, 2020.

Please note that the Phase One ESA Update pertains to the current Phase One Property, and another property which is adjacent to the Phase One Property. This report refers to the Phase One Property (374 Burnhamthorpe Road West) only.

Based on the review of records, the site visit and interview, it was determined that the Phase One Property and properties to the north & east of the Phase One Property had historically been, and was currently being used, for agricultural purposes. In addition, a portion of the northcentral section of the Phase One Property was historically used as an orchard. Therefore, it was determined that regulated pesticides may have been applied to the Phase One Property as part of the agricultural operations.

Pesticides (including herbicides, fungicides and anti-fouling agents) manufacturing, processing and large scale applications are identified as being potentially contaminating activity (PCA) #40 in Table 2 of Schedule E of the Environmental Protection Act. Hence, areas of potentially contaminating activities (APECs), in relation to PCA #40, were identified as being at the Phase One Property.

No other PCA was noted.

Since a PCA and associated APECs were identified as being at the Phase One Property, further investigation through a Phase Two ESA was recommended.

3.1.6.4 2020 Phase Two Environmental Site Assessment (AME)

A Phase Two Environmental Site Assessment ('Phase Two ESA') was conducted for the Phase One Property in the year 2020. The Phase Two ESA was titled 'Phase Two Environmental Site Assessment, 374 Burnhamthorpe Road West, Town of Oakville, Ontario (Reference No. 30291.124),' and was dated September 3, 2022.

The purpose of the Phase Two ESA was to retrieve samples of the topsoil and underlying soil at the Phase One Property in order to determine the suitability of the material for the proposed property use (residential use).

A total of eleven (11) topsoil samples and eleven (11) underlying native material samples were retrieved from a series of eleven (11) shallow hand-dug test pits advanced at the Phase One Property.

The test pit locations were chosen in order to provide sufficient horizontal and vertical coverage of the topsoil / underlying native material with respect to the PCA and APECs identified in the previous Phase One ESA Update (2020).

The samples were submitted for analysis of the following method groups – Metals, Arsenic / Antimony / Selenium, Boron (Hot Water Soluble), Cyanide, Chromium VI, Mercury, Low to High pH, Petroleum Hydrocarbons, Benzene / Toluene / Ethylbenzene / Xylenes, Polychlorinated Biphenyls and / or Organochlorine Pesticides.

The samples were compared to the Table 2 (Full Depth Generic Site Condition Standards for Use in a Potable Groundwater Condition) for Residential / Parkland / Institutional Property Use

Standards ('Table 2 RPI Standards') as per the 'Soil, Ground Water and Sediment Standards for Use under Part XV.1 of the Environmental Protection Act.'

Based on a review of the results of the chemical analysis, all the submitted sample results were within the Table 2 RPI Standards.

Hence, we were of the opinion that the environmental condition of the APECs had been appropriately characterized and the soil at the Phase One Property satisfied the conditions applicable for the proposed use of the property.

No further environmental works were deemed to be warranted.

3.1.6.5 Filing of RSC 230247 (2021)

A Record of Site Condition (RSC) application for the Phase One Property was submitted to the Ontario Ministry of the Environment, Conservation & Parks (MECP) in 2021, based on the information obtained through the geotechnical / environmental reports noted in the sections above.

The RSC application was acknowledged and filed by the MECP on December 3, 2021. For reference a copy of the RSC is presented in Appendix C.

3.1.7 EcoLog ERIS Report (20200609264)

As part of the 2020 Phase One ESA Update, a request was submitted to EcoLog Environmental Risk Information Services Ltd. (ERIS) to conduct a search of their databases for records pertaining to the properties within the Phase One Study Area. ERIS is a national service that provides site specific environmental and property-use information. ERIS report (20200609264) containing

detailed government and private sector records concerning possible environmental liabilities associated with the Phase One Property and the adjoining properties is enclosed in Appendix D.

At the time the referenced ERIS report was generated, the Phase One Property limits used in the assessment consisted of the properties comprised of 310 & 374 Burnhamthorpe Road West. This report refers to 374 Burnhamthorpe Road West only.

Based on the review of the ERIS Report, there were five (5) records for the Phase One Property and an additional nineteen (19) records for properties within 250 m from the boundaries of the Phase One Property.

The following summarizes the records noted:

ERIS Historical Searches

The ERIS Historical Searches database is a record of all products (i.e. Ecolog ERIS reports, aerial photographs, fire insurance plans, etc.) that have been ordered from ERIS in the past. An ERIS custom report was ordered for the Phase One Property in the year 2012.

This record is not considered to be a cause of environmental concern pertaining to the Phase One Property.

Ontario Water Well Information System

The MECP maintains records of all wells in the Province of Ontario.

There are two (2) record for wells at the Phase One Property. The wells are either listed as being abandoned or used to provide domestic water supply.

These wells are unlikely to affect the environmental condition of the Phase One Property.

The following summarizes the records for properties within the Phase One Study Area (other than the Phase One Property):

Commercial Fuel Oil Tank

The Technical Standards & Safety Authority (TSSA) is in charge of maintaining records of all registered fuel storage tanks within the Province of Ontario. There is one (1) record of a commercial fuel storage tank being at 194 Burnhamthorpe Road West, which is located adjacent to the north-eastern side of the Phase One Property. The commercial fuel oil tank is described as being a single wall steel tank used for fuel storage. The listed volume of the tank is 4,500 L.

Based on a review of the topographic maps and the aerial photographs, it appears that the tank is located at the rear of the property at 194 Burnhamthorpe Road West, approximately 30 m east of the Phase One Property. Note: Based on the review of the topographic map, the surface water runoff and groundwater flow directions are expected to flow away from the Phase One Property (from northwest to southeast). Any potential contamination from 194 Burnhamthorpe Road West is not expected to be transported to the Phase One Property through precipitation runoff and subsequent leaching.

ERIS Historical Searches

The ERIS Historical Searches database is a record of all products (i.e. Ecolog ERIS reports, aerial photographs, fire insurance plans, etc.) that have been ordered from ERIS in the past. In addition to the record for the Phase One Property, there are three (3) additional records of properties within the Phase One Study Area being in this database.

These records are not considered to be a cause of environmental concern pertaining to the Phase One Property.

Records of Site Condition

A Record Site Condition (RSC) is a document that outlines the environmental condition of a property, is filed with the MECP and is registered on the MECP Brownfields Database.

An RSC is filed for a property at 382 Burnhamthorpe Road West, which is located approximately 182 m west of the Phase One Property. The RSC was filed for the property using a Phase One ESA Update only as evidentiary support. Hence, it is not expected that any remedial activities were required in support of filing said RSC.

This is not considered to be an environmental concern pertaining to the Phase One Property.

Ontario Water Well Information System

The MECP maintains records of all wells in the Province of Ontario.

There are fourteen (14) records for wells at properties within the Phase One Study Area. The wells are either listed as being abandoned, used for monitoring or used to provide domestic water supply.

These wells are unlikely to affect the environmental condition of the Phase One Property.

3.2 Environmental Source Information

The following is a summary of the regulatory information searched as part of this Phase One ESA Update.

- The Waste Disposal Site Inventory was searched for any property at or within 250m of the boundaries of the Phase One Property that was an active or closed waste disposal facility. There is no record of any waste disposal site within the search criteria.

- The Municipal Coal Gasification Plant Sites database was searched for any property at or within 250 m from the boundaries of the Phase One Property. There is no record of any coal gasification plant within the search criteria.
- The Inventory of Industrial Sites Producing and Using Coal Tar and Related Tars in Ontario (1991) was searched for any property at or within 250 m from the boundaries of the Phase One Property. There is no record of any industrial site producing and using coal tar and related tars within the search criteria.
- The National Pollutant Release Inventory (NPRI) was searched for any property at or within 250 m from the boundaries of the Phase One Property. There is no record of any property under the NPRI within the search criteria.
- The 2008 and 2013 Ontario Regulation 153/04 Waste Generators Databases were searched for any property at or within 250 m from the boundaries of the Phase One Property. There is no record of any property under the NPRI within the search criteria.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Aerial photographs dated 1934, 1961, 1969, 1979, 1988, 1995, 2005, 2016 & 2019 were reviewed as part of the 2020 Phase One ESA Update. In addition, an aerial photograph from the year 2021 was reviewed as part of this Phase One ESA Update. A summary of the aerial photograph review is presented in Table C.

Table C: Aerial Photograph Review Summary

Year	Comments referring to Phase One Property	Comments referring to Neighbouring Properties
1934	The Phase One Property was mainly used for agricultural purposes. There are at least three (3) structures at the northwest corner of the Phase One Property. The structures appear to be a barn, a residential structure and a shed	The neighbouring properties were mainly used for agricultural purpose with residential components
1961, 1969 & 1979	A residential structure is being constructed at the northeast corner of the Phase One Property (at 210 Burnhamthorpe Road West). The remainder of the Phase One Property remains relatively unchanged.	The neighbouring properties remain relatively unchanged.

Table C: Aerial Photograph Review Summary (Continued)

Year	Comments referring to Phase One Property	Comments referring to Neighbouring Properties
1988, 1995, 2005 & 2016	The structures at the northwest corner of the Phase One Property were demolished prior to 1988.	Structures were constructed at the property to the southwest of the Phase One Property. In addition, a residential development is being constructed southeast of the Phase One Property in the 2016 aerial photograph.
2019 & 2021	A temporary roadway has been constructed through the centre of the Phase One Property.	The neighbouring properties remain relatively unchanged.

A copy of the 2021 Aerial Photograph is presented in Appendix D.

3.3.2 Geology, Topography, Hydrology, Source Water Protection & Natural Features

A review of the Surficial Geology of Southern Ontario Map issued by the Ontario Ministry of Natural Resources reveals that the surficial geology at the location of the Phase One Property mainly consists of Clay to Silt & Fine-Textured Glaciolacustrine Deposits. Glaciolacustrine deposits are derived from sediments which are deposited into lakes from glaciers. An excerpt from the Surficial Geology of Southern Ontario Map, showing the location of the Phase One Property, is included as Drawing No. 3 in Appendix A.

A review of the Bedrock Geology Sheet of Southern Ontario issued by the Ontario Ministry of Natural Resources reveals that the bedrock geology at the location of the Phase One Property consists of Shale, Limestone, Dolostone and Siltstone. An excerpt from the Bedrock Geology Sheet, showing the location of the Phase One Property, is included as Drawing No. 4 in Appendix A.

A review of a Topographic Map reveals that Phase One Property generally descends from the northwest to the southeast. Hence, the operations at the properties located northwest of the Phase One Property are most likely to affect the environmental condition of the Phase One Property through contaminant transfer by precipitation runoff and leaching. An excerpt of the Topographic Map, showing the location of the Phase One Property, is included as Drawing No. 5 in Appendix A.

A review of the Conservation Halton Watersheds Map reveals that the Phase One Property is located within the watershed designated as being the 16 Mile Creek Watershed. In general, the watercourses within the 16 Mile Creek Watershed flow in a north-westerly to south-easterly direction, towards Lake Ontario. The Conservation Halton Watersheds Map, showing the location of the Phase One Property, is included as Drawing No. 6 in Appendix A.

A review of a Source Water Protection Map issued by the Halton Region indicates that the Phase One Property and properties within 250 m from the boundaries of the Phase One Property, are not located within a source water protection area. An excerpt of the Source Water Protection Map, showing the location of the Phase One Property, is included as Drawing No. 7 in Appendix A.

3.3.3 Fill Material

Fill may be recognized by unusual surface formations or unnatural topography. Fill material from construction or demolition activities often differs in colour, texture, and drainage properties than the native soils, and may include such things as construction debris, municipal solid waste, or industrial waste products such as slag, cinders or ash.

Based on a review of the aerial photographs, a review of the previous geotechnical report, the site visit and the interviews, fill material has not been imported and disposed of on-site.

3.3.4 Water Bodies and Areas of Natural Significance Interest (ANSI)

Based on the review of the aerial photographs, topographic map and site visit, there is no watercourse traversing the Phase One Property.

3.3.5 Water Well Records

A search of the MECP water well records database website was conducted on December 19, 2022.

The review of the well records indicates that there are two (2) records for water wells at the Phase One Property.

Table D: Water Well Records

Water Well ID	Location on Phase One Property	Water Well Use	Depth of Well	Depth of Water
7279653	374 Burnhamthorpe Road West	Abandoned	No information	No information
2802135	374 Burnhamthorpe Road West	Domestic	17.0 m	16.2 m

Based on a review of the well records, the Phase One Property is generally underlain by topsoil, followed by native soils consisting of silt and clay.

3.4 Site Operating Records

The Phase One Property and the other properties within the Phase One Study Area were mainly used for agricultural purposes with residential components. Hence, it is not expected that records will be available.

A general internet search for the Phase One Property and other properties within 250 m from the boundaries of the Phase One Property was conducted on December 19, 2022. No cause for environmental concern was noted during our search.

4.0 INTERVIEW

An interview was conducted with a representative of the owner 374 Burnhamthorpe Road West on January 13, 2023. The following is the information obtained through the interview:

- There is no record of any spill or item of environmental concern pertaining to the Phase One Property.

- A gravel / dirt roadway was constructed at the Phase One Property in order to provide access for construction vehicles to the residential development property, south of the Phase One Property.
- There are no standing orders / environmental restrictions imposed upon the Phase One Property.
- The structures at the northwest section of the Phase One Property were demolished prior to the purchase of the property in 2007.
- There is no record of any fill material being placed at the location of the demolished structures.

Based on the interviews, no item of significant environmental concern was determined.

5.0 SITE RECONNAISSANCE

5.1 General

The Phase One Property was inspected by Sebastian Nicholas of AME on December 8, 2022, between 11:30 am and 1:00 pm. The purpose of the site inspection is to perform a general visual review of the Phase One Study Area and to identify any area of potential environmental concern pertaining to the Phase One Property. The Phase One Property was also inspected for any source of hazardous material.

At the time of the site visit, the temperature was approximately 5 Degrees Celsius and the sky was clear.

5.2 Site Description

The portion of the Phase One Property mainly consists of agricultural lands. There is a gravel roadway, used to provide access of construction vehicles / workers to a residential construction development, south of the Phase One Property from Burnhamthorpe Road West.

There is evidence of former buildings, a septic tank and dug well being at the northwest corner of the property. It does not appear that fill material was imported to the property during the demolition of the former structures.

The water in the dug well and the septic tank was examined and there was no sign of any light-non aqueous phase liquids (LNAPLs) which may suggest cause for environmental concern.

The portion of the Phase One Property located at 374 Burnhamthorpe Road West mainly consists of agricultural lands. There is a gravel roadway, used to provide access of construction vehicles / workers, to a residential construction development, south of the Phase One Property from Burnhamthorpe Road West.

Photographs depicting our site visit are presented below:

Photograph 3: Looking southwest across the Phase One Property

Photograph 4: Looking south along gravel access road traversing the Phase One Property

Photograph 5: Looking southeast across Phase One Property

5.2.1 Neighbouring Properties

The neighbouring properties consist of Burnhamthorpe Road West, followed by agricultural / residential properties / new roadway development to the north, residential and agricultural properties to the east, vacant agricultural properties and a residential development to the south & agricultural properties to the west. No property within the vicinity of the Phase One Property is used for automotive / industrial / gas station / dry-cleaning purposes.

Photograph 6: New roadway development north of the Phase One Property

Photograph 7: Residential properties east of the Phase One Property

5.3 Specific Observations

5.3.1 On-Site Buildings

There are no structures situated at the Phase One Property.

5.3.2 Aboveground and Underground Storage Tanks

There is no evidence of any aboveground storage tank and / or underground storage tank being at the Phase One Property.

5.3.3 Chemical Storage and Handling

No chemicals / chemical containers, other than standard household cleaners, were observed at the Phase One Property.

5.3.4 Solid (Non-Hazardous) and Liquid Waste

Wastes in the form of solid (non-hazardous) and liquid wastes are not generated at the Phase One Property.

5.3.5 Hazardous Waste/Registerable Waste

The Phase One Property is not listed as being a registered waste generator.

5.3.6 Spills, Releases and Emergency Response

There was no evidence of any odour emitted, spill, stain or stressed vegetation at the Phase One Property during the time of the investigation.

Furthermore, based on our interview and review of the pertinent information, there is no record of any previous spill at the Phase One Property.

5.3.7 Air Emissions

Air emission sources that could potentially affect the environmental quality of the site were not observed at the time of the investigation.

5.3.8 Water, Wastewater and Storm Water

Based on our site visit, there is an abandoned septic system at the northwest corner of 374 Burnhamthorpe Road West.

5.3.14 Polychlorinated Biphenyl (PCB)-Containing Equipment

No PCB containing equipment was noted as being at the Phase One Property.

5.3.15 Lead

No lead containing equipment was noted as being at the Phase One Property.

5.3.16 Urea Formaldehyde Foam Insulation (UFFI)

No UFFI was noted as being at the Phase One Property.

5.3.17 Ozone-Depleting Substances (ODSs)

No ODSs were noted as being at the Phase One Property.

5.3.18 Radon

Based on the overburden and bedrock materials underlying the Phase One Study Area, it is unlikely that radon gas emissions would be a concern on the property.

5.3.19 Pesticides and Herbicides

Based on our review of records and our site visit, the Phase One Property has historically been used and is currently being used for agricultural purposes. Although the Phase One Property is currently used to grow cash crops, mainly for animal feed, a crop type that does not require significant pesticide / herbicide application, we are uncertain if pesticides / herbicide were applied to the Phase One Property historically. In addition, based on the historical data, there was an orchard located at the northern central section of the Phase One Property.

Please note that a Phase Two ESA was conducted for the Phase One Property in the year 2020, where the topsoil and underlying native soil material was sampled and submitted for analysis pertaining to the contaminants of concern noted in topsoil.

No contamination was noted. Hence, we are of the opinion that any potential use of pesticides at the Phase One Property in the past had no adverse environmental affect on the soil at the Phase One Property.

5.3.20 Odour / Noise

The air at the Phase One Property is devoid of any odour that would suggest the presence of any environmentally significant contamination at the Phase One Study Area.

There is no source of noise, other than the ambient noise from the light traffic on Burnhamthorpe Road West. Hence, we do not consider there to be an issue with noise at the Phase One Property.

5.3.21 Building Heating Systems

There is no structure at the Phase One Property.

5.3.22 Unidentified Substances

No unidentified substance / substance container was observed at the Phase One Property.

5.3.23 Demolished Buildings

Based on our review of records and the site visit, there are demolished buildings at the northwest corner of 374 Burnhamthorpe Road West. An inspection of the vicinity of the demolished buildings suggests that debris from demolition and fill material are not present.

5.3.24 Utilities

Based on our site visit, there is no evidence of underground Utilities being at the Phase One Property.

5.4 Enhanced Investigation Property

The Phase One Property is not considered an enhanced investigation property as it has never been used for automotive purposes (including garages, gas stations, etc.), for industrial purposes, or for the operation of dry-cleaning equipment.

6.0 REVIEW AND EVALUATION OF INFORMATION

6.1 Current and Past Uses

The Phase One Property is irregular in shape and consists of an area of approximately 36.42 hectares (90 acres). The Phase One Property mainly consists of agricultural lands. There is a gravel roadway, used to provide access of construction vehicles / workers to a residential construction site south of the Phase One Property from Burnhamthorpe Road West.

It is our understanding that a residential development is proposed for the Phase One Property.

6.2 Potentially Contaminating Items/Activities

Please note that potentially contaminating activity (PCA) was established as being at the Phase One Property in connection with our previous 2020 Phase One ESA Update. The PCA referred to the previous potential use of regulated pesticides in association with the current and past use of the Phase One Property as an agricultural property.

A Phase Two ESA was conducted for the Phase One Property in 2020. As part of the Phase Two ESA, topsoil and underlying native soil samples were retrieved and submitted for the potential contaminants of concern associated with regulated pesticide use.

Based on the results of the analysis, and confirmation through our interview that regulated pesticides have not been applied to the Phase One Property since our 2020 Phase Two ESA, we are of the opinion that previous application of regulated pesticides (if any), has not had an adverse effect on the soil quality at the Phase One Property.

Hence, the previously identified PCA is no longer considered to be a concern.

6.4 Conceptual Site Model

With respect to the Phase One ESA Update Conceptual Site Model (Phase One CSM), the following key site features are outlined (as required by O. Reg. 153/04):

- Any existing building or structure;
- Water bodies and areas of natural significance located in Phase One Study Area;
- Wells on Phase One Property;
- Roads (including names) within Phase One Property;
- Property uses adjacent to the Phase One Property;
- Location of identified potentially contaminating activities (“PCAs”) in the Phase One Study Area (including any storage tanks); and,

- Location of identified areas of potential environmental concern (“APECs”) on the Phase One Property.

The following describes the Phase One CSM for the Site based on the information obtained and reviewed, as part of the Phase One ESA Update of the Site.

- The Phase One Property consists of an agricultural property.
- The Phase One Property is located within the 16 Mile Creek watershed.
- Based on the well records, there are three (3) records of wells at the Phase One Property.
- No property within the vicinity of the Phase One Property is used for automotive / industrial / gas station / dry-cleaning purposes.
- Based on a review of the available geological data, the native subsoil at the Phase One Study Area predominately consists of silt and clay.
- Based on a review of the aerial photographs, a review of the previous geotechnical report, the site visit and the interview, fill material has not been deposited at the Phase One Property.
- The inferred bedrock depth elevation in the Phase One Study Area is expected to be in excess of 2.0 mbgs (Open file map number 196, Bedrock Topography of Markham Area, 1:50,000, Ministry of Northern Development and Mines, 1992). As per Ontario Geological Survey, the bedrock in the Study Area generally consists of shale, limestone, dolostone and siltstone.
- It is anticipated that groundwater will flow in a southeasterly direction, generally following the topography of the Phase One Study Area.

There were no material deviations to the Phase One ESA Update requirements set out in O. Reg. 153/04 (as amended) that in the opinion of the Qualified Person (“QP”) would cause uncertainty or absence of information that would affect the validity of the findings of this assessment.

A Phase One Conceptual Site Model Plan is included as Drawing No. 8 in Appendix A.

7.0 CONCLUSIONS AND RECOMMENDATIONS

The topsoil / underlying soil at the Phase One Property was previously sampled and submitted for analysis of potential contaminants of concern pertaining to the potential historic application of regulated pesticides as part of the agricultural use. Furthermore, it is our understanding that regulated pesticides have not been applied to the Phase One Property since our previous investigations in 2020.

Based on the review of the sample results, there is no evidence that the application of regulated pesticides (if any) had an adverse environmental effect on the environmental quality of the topsoil / underlying soil at the Phase One Property.

Hence, we are of the opinion that the Phase One Property is suitable for the proposed development.

8.0 QUALIFICATIONS OF ASSESSORS

The review and evaluation of the historical information for this assessment was carried out by Mr. Anthony Upper. The site visit was conducted by Mr. Sebastian Nicholas on December 8, 2022. This assessment was also carried out under the supervision of Mr. Sebastian Nicholas. The findings of the investigation are complete and accurate and are included in the report.

Sebastian Nicholas is a Senior Engineer with AME – Materials Engineering (AME). Sebastian has completed numerous environmental due diligence assessments, Phase One and Two Environmental Site Assessments. Sebastian has over twenty-five (25) years of experience working with public and private sector organizations. Sebastian obtained a Master of Science (M.S.) degree in Earth Sciences at South Dakota School of Mines and Technology and is a Registered Professional Engineer with the Association of Professional Engineers of Ontario. He is also registered with the Ministry of the Environment as a Qualified Person (QP) with respect to the completion of Records of Site Condition based on Phase One & Two Environmental Site Assessments, as per the amended Ontario Regulation 153/04.

Anthony Upper is a Project Manager with AME. Anthony has completed numerous environmental projects including Phase One and Two Environmental Site Assessments and remediation projects. Anthony has over ten (10) years of experience working in private sector organizations. Anthony obtained a Bachelor of Sciences (B.Sc.) in Earth Sciences and Physical Geography at Brock University and a Diploma of Environmental Protection Technology at Centennial College.

AME is a specialty firm involved in environmental, geotechnical and materials testing. The Caledon office of AME provides a full range of environmental services.

11.0 CLOSURE

We trust that we have detailed our findings clearly and that we have satisfactorily addressed the scope of work you require at this time. In the event you wish us to review our findings with you, or require our services further in this regard, please do not hesitate to contact our office.

The General Considerations and Limitations pertaining to the entirety of this report are included in Appendix F.

Yours truly,

AME - Materials Engineering

OF THE FIRST PART;

- and -

ENO INVESTMENTS LIMITED, A Corporation
Incorporated under the laws of the Province
of Ontario,

Hereinafter called the Grantor,

OF THE SECOND PART.

Witnesseth that in consideration of other good and valuable consideration and the

sum of TWO-----(\$2.00)-----DOLLARS

now paid by the said Grantee to the said Grantor, the receipt whereof is hereby by him
acknowledged, he the said Grantor DOTH GRANT unto the said Grantee in fee simple

THOSE lands and premises located in the following municipality, namely, in the Town
of Oakville, in the Regional Municipality of Halton (formerly the Township
of Trafalgar, in the County of Halton)

and being composed of

FIRSTLY:

Part of Lot 19, Concession 1, North of Dundas Street and designated as
Part 2 on a plan of Survey of Reference as No. 20R-2752.

SECONDLY:

continued on page 1(a)

SECONDLY:

ALL AND SINGULAR that certain parcel or tract of land and premises situate, lying and being in the Town of Oakville, formerly in the Township of Trafalgar, in the County of Halton and Province of Ontario, containing by admeasurement 51.538 acres more or less, being composed of part of Lot 18 in the First Concession North of Dundas street in said Town, more particularly described as follows:

PREMISING that the north western limit of said Lot 18, in the First Concession North of Dundas Street in said Town, has an assumed bearing of North Thirty-Eight Degrees East (N38°E) and relating all bearings herein thereto;

COMMENCING at the northern angle of said Lot 18 as marked by a survey monument;

THENCE South Forty-Four Degrees Forty-Nine Minutes Twenty Seconds East (S44° 49' 20" E) along the north eastern limit of said Lot 18, as fenced One Thousand, Six Hundred and Seventy-Six and Fourteen Hundredths feet (1767.14') to an iron bar;

THENCE South Thirty-Seven Degrees Seventeen Minutes Thirty Seconds West (S37° 17' 30" W) along a line of fence, One Thousand Three Hundred and Thirty-One and Eighty-Five Hundredths Feet (1331.85') to an iron bar in the south western limit of said Lot 18 as fenced;

THENCE North Forty-Five Degrees Eleven Minutes Ten Seconds West (N45° 11' 10" W) along the last described south western limit as fenced One Thousand, Seven Hundred and One and Seventy-Three Hundredths Feet (1701.73') more or less to an iron bar in the north western limit of said Lot 18;

THENCE North Thirty-Eight Degrees (N38° E) East along said north western limit of Lot 18, a distance of One Thousand Three Hundred and Forty and Fifty-Six Hundredths Feet (1340.56') more or less to the point of commencement, as described in Instrument No. 266693.

TO HAVE AND TO HOLD unto the said Grantee, his heirs, executors, administrators, successors and assigns to and for their sole and only use forever;
SUBJECT NEVERTHELESS to the reservations, limitations, provisos and conditions expressed in the original grant thereof from the Crown.

The said Grantor COVENANTS with the said Grantee that he has the right to convey the said lands to the said Grantee notwithstanding any act of the said Grantor.

AND that the said Grantee shall have quiet possession of the said lands free from all encumbrances.

AND the said Grantor COVENANTS with the said Grantee that he will execute such further assurances of the said lands as may be requisite.

AND the said Grantor COVENANTS with the said Grantee that he has done no act to encumber the said lands.

AND the said Grantor RELEASES to the said Grantee ALL his claims upon the said lands.

PROVIDED that in construing these presents the words "Grantor" and "Grantee" and the pronouns "he", "his" or "him" relating thereto and used therewith shall be read and construed as "Grantor" or "Grantors", "Grantee" or "Grantees", and "he", "she", "it" or "they", "his", "her", "its" or "their", or "him", "her", "it" or "them", respectively, as the number and gender of the party or parties referred to in each case require, and the number of the verb agreeing therewith shall be construed as agreeing with the said word or pronoun so substituted.

IN WITNESS WHEREOF the said parties hereto have hereunto set their hands and seals.

SIGNED, SEALED AND DELIVERED
In the Presence of

GDYNIA DEVELOPMENTS LIMITED

Per

President

AFFIDAVIT OF RESIDENCE AND OF VALUE OF THE CONSIDERATION

IN THE MATTER OF THE CONVEYANCE OF (insert brief description of land) Part of Lots 18 and 19, Concession 1,
Town of Oakville

BY (print names of all transferors in full) GDYNIA DEVELOPMENTS LIMITED

TO (see instruction 1 and print names of all transferees in full) ENO INVESTMENTS LIMITED

I, (see instruction 2 and print name(s) in full) RUDOLPH PETER BRATTY

MAKE OATH AND SAY THAT:

- 1. I am (place a clear mark within the square opposite that one of the following paragraphs that describes the capacity of the deponent(s): (see instruction 2))
 - (a) A person in trust for whom the land conveyed in the above-described conveyance is being conveyed;
 - (b) A trustee named in the above-described conveyance to whom the land is being conveyed;
 - (c) A transferee named in the above-described conveyance;
 - (d) The authorized agent or solicitor acting in this transaction for (insert name(s) of principal(s))

described in paragraph(s) (a), (b), (c) above; (strike out references to inapplicable paragraphs)

- (e) The President, Vice-President, Manager, Secretary, Director, or Treasurer authorized to act for (insert name(s) of corporation(s))
ENO INVESTMENTS LIMITED

described in paragraph(s) (a), (b), (c) above; (strike out references to inapplicable paragraphs)

- (f) I am a transferee described in paragraph () (insert only one of paragraph (a), (b) or (c) above, as applicable) and am making this affidavit on my own behalf and on behalf of (insert name of spouse) who is my spouse described in paragraph () (insert only one of paragraph (a), (b) or (c) above, as applicable)

and as such, I have personal knowledge of the facts herein deposed to.

- 2. I have read and considered the definitions of "non-resident corporation" and "non-resident person" set out respectively in clauses 1 (1)(f) and (g) of the Act. (see instruction 3).

- 3. The following persons to whom or in trust for whom the land conveyed in the above-described conveyance is being conveyed are non-resident persons within the meaning of the Act. (see instruction 4) NONE

4. THE TOTAL CONSIDERATION FOR THIS TRANSACTION IS ALLOCATED AS FOLLOWS:

(a) Monies paid or to be paid in cash	\$ 2.00	
(b) Mortgages (i) Assumed (show principal and interest to be credited against purchase price)	\$ nil	
(ii) Given back to vendor	\$ nil	
(c) Property transferred in exchange (detail below)	\$ nil	
(d) Securities transferred to the value of (detail below)	\$ nil	
(e) Liens, legacies, annuities and maintenance charges to which transfer is subject	\$ nil	
(f) Other valuable consideration subject to land transfer tax (detail below)	\$ nil	
(g) VALUE OF LAND, BUILDING, FIXTURES AND GOODWILL SUBJECT TO LAND TRANSFER TAX (TOTAL OF (a) to (f))	\$ 2.00	\$ 2.00
(h) VALUE OF ALL CHATTELS - Items of tangible personal property (Retail Sales Tax is payable on the value of all chattels unless exempt under the provisions of the "Retail Sales Tax Act", R.S.O. 1980, c.454, as amended)	\$ nil	
(i) Other consideration for transaction not included in (g) or (h) above	\$ nil	
(j) TOTAL CONSIDERATION	\$ 2.00	\$ 2.00

ALL BLANKS
MUST BE
FILLED IN.
INSERT "NIL"
WHERE
APPLICABLE.

- 5. If consideration is nominal, describe relationship between transferor and transferee and state purpose of conveyance. (see instruction 5)

- 6. If the consideration is nominal, is the land subject to any encumbrance?

- 7. Other remarks and explanations, if necessary. This Deed was signed, sealed and delivered to the Grantee on the 20th day of January, 1983. This Deed is registered to correct a deed which was inadvertently registered on the 20th day of March, 1985 as Instrument No. 616345.

SWORN before me at the City of North York,
in the Municipality of Metropolitan Toronto,
this 20th day of January, 1986

A Commissioner for taking Affidavits, etc.

APPENDIX C:

2021 RSC

Phase One Environmental Site Assessment Update
Eno Investments Limited Property
374 Burnhamthorpe Road West
Town of Oakville, Ontario

Record of Site Condition
Under Part XV.1 of the Environmental Protection Act

Summary

Record of Site Condition Number	230247
Date Filed to Environmental Site Registry	2021/12/03
Certification Date	2020/08/25
Current Property Use	Agricultural/Other
Intended Property Use	Residential
Certificate of Property Use Number	No CPU
Applicable Site Condition Standards	Full Depth Generic Site Conditions Standard, with Potable Ground Water, Coarse Textured Soil, for Residential property use
Property Municipal Address	374 BURNHAMTHORPE ROAD WEST, OAKVILLE, ON, L6M 4K4

Notice to Readers Concerning Due Diligence

This record of site condition (RSC) has been filed in the Environmental Site Registry to which the public has access and which contains a notice advising users of the Environmental Site Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Environmental Site Registry.

Contents of this Record of Site Condition

This RSC consists of this document which is available to be printed directly from the Environmental Site Registry as well as all supporting documentation indicated in this RSC to have been submitted in electronic format to the Ministry of the Environment, Conservation and Parks.

Part 1: Property Ownership, Property Information and Owner's Certifications

Information about the owner who is submitting or authorizing the submission of the record of site condition

Owner name	ENO INVESTMENTS LIMITED
Owner type	Firm, corporation or partnership
Authorized person	CHRISTOPHER BRATTY
Mailing address	SUITE 100, 7501 KEELE STREET, VAUGHAN Ontario, Canada
Postal Code	L4K 1Y2
Phone	(905) 761-8200

...Continued on next page

Table 1 – Maximum contaminant concentrations compared to applicable site condition standards

Measured concentration for contaminants in soil

Continued from previous page....

Contaminant name	Maximum concentration	Applicable site condition	Unit of measure
36 Chromium Total	31	160	µg/g
37 Cobalt	12.4	22	µg/g
38 Copper	30	140	µg/g
39 Lead	35	120	µg/g
40 Molybdenum	0.9	6.9	µg/g
41 Nickel	24	100	µg/g
42 Silver	0.4	20	µg/g
43 Thallium	< 0.4	1	µg/g
44 Uranium	1.2	23	µg/g
45 Vanadium	43	86	µg/g
46 Zinc	104	340	µg/g

Remedial action and mitigation

Remediated soils

Estimated quantities of the soil, if any, originating at and remaining on the record of site condition property that have been remediated, at a location either on or off the property, to reduce the concentration of contaminants in the soil. Indicate the remediation process or processes used and the estimated amount of soil remediated by each identified process.

Soil remediation process	Estimated quantity of soil (in ground-volume in cubic metres)

Description of remediation

Description of any action taken to reduce the concentration of contaminants (including soil removals) on, in or under the record of site condition property.

Soil or sediment removed and not returned

Estimated quantities of soil or sediment, if any, removed from and not returned to the record of site condition property.

Estimated quantity of soil (in ground-volume in cubic metres)	
Estimated quantity of sediment (in ground-volume in cubic metres)	

Soil brought to the property

Estimated quantity of the soil, if any, being brought from another property to and deposited at the record of site condition property, not including any soil that may have originated at but been remediated off the record of site condition property and that is identified in section 28 of Schedule A.

Estimated quantity of soil brought to the property (in ground-volume in cubic metres)	
---	--

Ground water control or treatment measures

Ground water control or treatment measures that were required for the record of site condition property prior to the certification date for the purpose of submitting the record of site condition for filing.

Ground water control or treatment measures that are required for the record of site condition property after the certification date.

Estimated volume of ground water, if any, removed from and not returned to the record of site condition property.

Estimated volume of ground water (in litres)	<input type="text"/>
--	----------------------

Other activities including risk management measures

Constructed works that prior to the certification date for the purpose of submitting the record of site condition for filing, were required to control or otherwise mitigate the release or movement of known existing contaminants at the record of site condition property.

Constructed works that after the certification date, are required to control or otherwise mitigate the release or movement of known existing contaminants at the record of site condition property.

Monitoring or Maintenance

Soil Management Measures

Soil monitoring requirements or any requirements for care, maintenance or replacement or any monitoring or control works for known existing contaminants, if any, on the record of site condition property, after the certification date.

Ground water management measures

Ground water monitoring requirements or requirements for care, maintenance or replacement of any monitoring or control works or known existing contaminants, if any, on the record of site condition property, after the certification date.

Remediated or removed soil, sediment or ground water from near property boundary

Has any soil, sediment or ground water at the record of site condition property that is or was located within 3 metres of the record of site condition property boundary been remediated or removed for the purpose of remediation?

No

C Qualified person's statements and certifications

As the qualified person, I certify that:

A phase one environmental site assessment of the record of site condition property, which includes the evaluation of the information gathered from a records review, site reconnaissance, interviews, a report and any updates required, has been conducted in accordance with the regulation by or under the supervision of a qualified person as required by the regulation.

A phase two environmental site assessment of the record of site condition property, which includes the evaluation of the information gathered from planning and conducting a site investigation, a report, and any updates required, has been conducted in accordance with the regulation by or under the supervision of a qualified person as required by the regulation.

The information represents the site conditions at the sampling points at the time of sampling only and the conditions between and beyond the sampling points may vary.

As of 2020/08/25, in my opinion, based on the phase one environmental site assessment and the phase two environmental site assessment, and any confirmatory sampling, there is no evidence of any contaminants in the soil, ground water or sediment on, in or under the record of site condition property that would interfere with the type of property use to which the record of site condition property will be put, as specified in the record of site condition.

As of 2020/08/25, in my opinion, based on the phase one and phase two environmental site assessments, and any confirmatory sampling, which included the sampling and analysis of soil, it is not necessary to conduct sampling and analysis of ground water quality for the record of site condition property to make the certified statement set out in paragraph 3 of section 17 of Schedule A.

As of 2020/08/25, in my opinion, based on the phase one and phase two environmental site assessments and any confirmatory sampling, the record of site condition property meets the applicable full depth generic site condition standards prescribed by section 36 of the regulation for all contaminants prescribed by the regulation in relation to the type of property use for which this record of site condition is filed, except for those contaminants (if any) specified in this record of site condition at Table 2, Maximum contaminant concentrations compared to standards specified in a risk assessment.

As of 2020/08/25, the maximum known concentration of each contaminant in soil, sediment and ground water at the record of site condition property for which sampling and analysis has been performed is specified in this record of site condition at Table 1, maximum contaminant concentrations compared to applicable full depth generic site condition standards.

I am a qualified person and have the qualifications required by section 5 of the regulation.

I have in place an insurance policy that satisfies the requirements of section 7 of the regulation.

I acknowledge that the record of site condition will be submitted for filing in the Environmental Site Registry, that records of site condition that are filed in the Registry are available for examination by the public and that the Registry contains a notice advising users of the Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Registry.

The opinions expressed in this record of site condition are engineering or scientific opinions made in accordance with generally accepted principles and practices as recognized by members of the environmental engineering or science profession or discipline practising at the same time and in the same or similar location.

I do not hold and have not held and my employer AECON MATERIALS ENGINEERING CORP. does not hold and has not held a direct or indirect interest in the record of site condition property or any property which includes the record of site condition property and was the subject of a phase one or environmental site assessment or risk assessment upon which this record of site condition is based.

To the best of my knowledge, the certifications and statements in this part of the record of site condition are true as of 2020/08/25.

By signing this record of site condition, I make no express or implied warranties or guarantees.

By checking the boxes above, and entering my membership/licence number in this submission, I, SEBASTIAN NICHOLAS, a qualified person as defined in section 5 of O. Reg. 153/04 am, on 2021/10/29:

a) signing this record of site condition submission as a qualified person; and

- a) signing this record of site condition submission as a qualified person; and
- b) making all certifications required as a qualified person for this record of site condition.

I agree

Additional documentation provided by property owner or agent

The following documents have been submitted to the Ministry of the Environment, Conservation and Parks as part of the record of site condition

Certificate of status or equivalent for the owner
Authorization for agent to submit record of site condition for filing
Lawyer's letter consisting of a legal description of the property
Copy of any deed(s), transfer(s) or other document(s) by which the record of site condition property was acquired
A Current plan of survey
Area(s) of potential environmental concern
Table of current and past uses of the phase one property
Phase 2 conceptual site model
Owner or agent certification statements

As an agent acting on behalf of the owner of the RSC property:

1. I acknowledge that the RSC will be submitted for filing in the Environmental Site Registry, that records of site condition that are filed in the Registry are available for examination by the public and that the Registry contains a notice advising users of the Registry who have dealings with any property to consider conducting their own due diligence with respect to the environmental condition of the property, in addition to reviewing information in the Registry.
2. I have conducted reasonable inquiries to obtain all information relevant to this RSC, including information from the other current owners of the RSC property named in this part of the RSC and I have obtained all information relevant to this RSC of which I am aware.
3. I have disclosed all information referred to in paragraph 2 to any qualified person named in this RSC.
4. To my knowledge, the statements made in this part of the RSC are true as of October 29, 2021.
5. I have ensured that access to the entire property, including the phase one property, any phase two property and the RSC property, has been afforded to the qualified person and to persons supervised by the qualified person, for purposes of conducting the site reconnaissance.

I certify that I have been authorized by the owner of the RSC property to make the statements prescribed by this section on their behalf and that the owner of the RSC property has read and understands the statements being made on their behalf.

Name of the Agent Sebastian Nicholas

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jan 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Chemical Register:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Feb 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Dec 2019

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Apr 30, 2020

Drill Hole Database:

Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Apr 30, 2020

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Apr 30, 2020

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Apr 30, 2020

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2020

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial [EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial [EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities:

Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Federal Convictions:

Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2020

Fisheries & Oceans Fuel Tanks:

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic:

Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jan 31, 2020

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2020

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 29, 2020

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2019

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Apr 30, 2020

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988 - Apr 2020

Pipeline Incidents:

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Apr 30, 2020

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental clean-up orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2020

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jan 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Nov 2019

Wastewater Discharger Registration Database:

Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Apr 30, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Feb 28, 2019

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

General Considerations and Limitations

Phase One Environmental Site Assessment Update
Eno Investments Limited Property
374 Burnhamthorpe Road West
Town of Oakville, Ontario

GENERAL CONSIDERATIONS AND LIMITATIONS

The information presented in this report is based on the historical data obtained from readily available public records, information provided by others and direct visual observation made by personnel with AME as identified herein. This assessment did not include such tasks as intrusive investigations, sample gathering or laboratory testing. Recommendations contained within our report reflect our informed opinion based on the information obtained during our investigation. The findings cannot be extended to portions of the site that were not reviewed or that were concealed or unavailable for direct observation at the time of our visit.

This report describes the conditions present on the property, and is intended to reduce, but not necessarily eliminate, uncertainty regarding the potential for significant environmental conditions to exist on the property.

The conclusions and recommendations detailed in this report are based upon the information available at the time of preparation of the report. No investigative method eliminates the possibility of obtaining imprecise or incomplete information. Professional judgment was exercised in gathering and analyzing the information obtained and in the formulation of our conclusions and recommendations.

AME does not certify or warrant the environmental status of the property.

This report was prepared by **AME** for the exclusive use of the client and may not be used in whole or in part by any third party unless the client, in writing, requests that information be provided to a third party or unless disclosure by **AME** is required by law. Any use by a third party, of reports or documents authored by **AME**, or any reliance by a third party, or decisions made by a third party, on the findings described in reports or documents authored by **AME**, is the sole responsibility of such third parties. **AME** accepts no responsibility for damages suffered by any third party as a result of decisions made or work carried out based on reports or documents authored by **AME**.

Please note that the passage of time affects the information provided in this report. Environmental conditions of a site can change. Opinions relating to the site conditions are based upon information that existed at the time that the conclusions were formulated.
