## WASTE MANAGEMENT PLAN – 70 OLD MILL ROAD

To: Planning Department  
Town of Oakville  
1225 Trafalgar Road

To the Planning Department,

It is the ownership's goal to create the most efficient and streamlined waste management plan for 70 Old Mill Road. In order to achieve this the building, secure the services of private waste and recycling pick up on a weekly basis. Scheduling of the pickup will be coordinated with residential traffic and the adjacent buildings garbage pickup schedule to ensure that there is no interference or inconvenience caused to the adjacent building residence or the residence of 70 Old Mill Road.

The building is designed with a large 2-storey garbage room, directly accessible from the main vehicular access point to the building located fully on 70 Old Mill private property. This room will be refrigerated and have its own ventilation system to prevent any odours from seeping into the building between pick-ups.

Ownership will make every effort to divert materials away from landfill disposal by promoting green bin (composting) and recycling programs within the building by installing a tri-sorter system on every residential floor of the building.

Regards,

Ava Janikowski RAIC, OAA
